

M2M , IOT SYSTEMS

Bringing Solutions together

TYPICAL APPLICATIONS AT THE BASIC SYSTEM LEVEL

1. Each M2M or IoT device, can use NFC, BT, Wifi, etc to collect data
2. Monitoring node to aggregate information, software updates, security , apply intelligence and control the data to send out
3. Cloud based management of devices, tracking, information for internal and external networks (www)
4. Once on the www, access to info via cloud based management
